

We create chemistry

WALLTITE® Max Closed-cell Spray Foam

MAXimize yield - MAXimize productivity - MAXimize profits

WALLTITE® Max is a lower-density, HFO-based closed-cell SPF insulation formulated for high-yield application performance while meeting GREENGUARD Gold standards and other robust requirements. It is ideal for insulation and air sealing applications in residential and commercial construction. WALLTITE Max provides contractors with improved yield, consistent thermal values, and superior application performance.

Get more with less, with WALLTITE Max:

- Less thickness required due to higher R-value per inch
- Less product needed due to high yields
- Less labor with 4" high-lift single pass applications
- More productivity with back-to-back passes (no dwell time between)
 - > R-49 with two 3.5" passes, with no cooling time
- Superior sprayability with HFO chemistry
- Coverage rates 5300 - 6000 bd.ft. per set
- Lower installed cost per R-value than other HFO foams
- Less material used = MAX profitability

Additional Product Features and Qualifications:

- GREENGUARD Gold certification
 - > Documented low-VOC material for improved IAQ
- Quick re-entry time
 - > 2 hours for other trades with proper ACH
- Low-GWP, HFO-based formulation
- NFPA 285 compliant assemblies available
- Attic and crawlspace approvals per Appendix X with no ignition barrier
- Intertek Code Compliance Research Report (CCRR-0374)
